- In this text editor , there are multiple functionality like we can convert the text from upper to lower and lower to upper case and also we can copy this text.

- Tech: HTML5 CSS3 Bootstrap

Gemini

[github](#) 

- Gemini is a zodiac sign and a constellation, as well as the name of a Google AI model. This AI model is used for generating the new information what you want
- Tech: HTML5 CSS3 Bootstrap MERN

Password Generator

[github](#) 

- In this password generator application , we can easily generate password which is combination of character , number and special symbol . This is a strong password generator because it generate the combination of uppercase and lowercase letters, numbers, special characters, and are sufficiently long (usually at least 12–16 characters)
- Tech: HTML5 CSS3 Bootstrap ReactJs

BookStore

[github](#) 

- BookStore website is a website in which we can store the book for reading. This book store can access the person who have registered. In this app, unauthorised person can not access the book. This is helpful for who want to read the book using different type of devices.
- Tech: HTML5 CSS3 Bootstrap MERN

Unbrew
